

REEFSCAPE
BEACHFRONT APARTMENTS

"Living by the sea; waking up to the symphony of the waves, feeling the balmy sea breeze and walking along an idyllic sandy beach..."
Live The Privilege . Live By The Beach . Live Luxury

Living with privileges

Designed to delight the senses, Reefscape Beachfront Apartments is a striking beachfront apartment development of 4 apartment units and 1 sumptuous penthouse with private pool all set along a white sandy beach and crystal blue lagoon in the prestigious north coast of Mauritius Island.

Vivre Privilégiés

Reefscape se situe dans l'une des régions les plus prisées de l'île: Pointe aux Biches. Les appartements de Reefscape offrent un espace de vie aéré ouvert sur l'extérieur à la Mauricienne. Utilisant des matériaux nobles tels que le bois et la pierre, le mobilier ainsi que les équipements allient style épuré et modernité.

L'accès rapide de la route, aux différentes villes du Nord et à la capitale est appréciable. Sa plage de fin sable blanc bordée de filaos, étend sa courbe le long de la côte, créant ainsi une baie d'eau turquoise.

Emplacement Idéale
Ideal Location

Living North Coast

Vibrant Seaside Region

Magnificent Sea, Sun and Sand, its an all year round joyful life living by the beach. Living along Pte aux Biches coast is serene surrounded by high standing beachfront residences yet sea and land activities, shopping malls, International north schools and as well as a vibrant nightlife are within 15 minutes reach.

Vivre dans la Côte Nord

Région Animée et Balnéaire

Le Nord, région hautement touristique et balnéaire, riche d'un patrimoine naturel, humain et culturel, saura éveiller toutes vos curiosités. Fans d'activités nautiques en tous genres, de loisirs nocturnes, ou accros du shopping, la région se décline et se réinvente pour répondre à tous vos désirs: restaurants, boutiques, activités culturelles cosmopolites, cinémas, petits villages typiques, marchés colorés, club de plongée, sports et loisirs nautiques. La vie dans le Nord est rythmée et dynamique toute l'année.

Specifications

External Building

- Use of insulated reinforced concrete building system which uses the light weight, yet very strong panels resistant to cyclonic weather conditions.
- The advantage of the system is the timeframe of the construction duration is reduced to nearly half.
- Foundation will be in reinforced concrete
- Walls – 200mm reinforced panels with concrete
- Rendering – insulated panels (200mm) are pre-rendered and have only a skimming to do
- Timber Posts where specified
- Glazed balustrades to balconies
- Decorative stones where specified
- Landscaping as per the Masterplan
- Driveway and parking areas in asphalt
- External windows and doors are powered coated aluminum finish resistant to wind gusts up to 280 km/hr.
- Solid timber entrance door
- Anti-skid tiles where specified
- 3 coats of paint Permotop
- Tiles in common areas
- Anti-skid tiles where exposed to rain
- Front boundary wall to be re-constructed
- Complete sewer system with septic tank

General Interior Finishes

- Partition walls – Insulated panels (150mm)
- 3 coats of paint matt emulsion
- Glazed balustrades to balconies
- Semi-solid timber doors internal with lacquered or vanish finish
- Tiles as per Brochure
- Tiles on floor and wall for Bathroom and toilet
- Timber skirting where specified
- Smooth skimming finish for ceilings

Roof Finishes

- Roof slab with Insulated panels and reinforced concrete
- Waterproofing membrane on concrete slab
- Timber and steel structure at penthouse as per brochure
- Anti-skid tiles in open lounge
- Timber decking at open dining

Amenities

- Air conditioning installation in all bed rooms
- Provision for Air conditioning in Living room
- Gas water heater installation for bathroom & kitchen
- Baths, showers and glass doors, sink and appropriate mixers supplied as per drawings
- Provision will be made for satellite TV
- Kitchen Appliances – Built-in Microwave (Bosch), Built-in Ceramic Hobs (Bosch), Fridge, Dishwasher (Optional), Kitchen Design Island Counter with Quartz Counter Tops, Installation and Kitchen Cabinet Works by Nolte Kitchen (German Brand)
- Provision for internet
- Telephone points
- Ceiling fan in living room
- Technical room for water pump and standby Generator

Electrical Services

- Concealed wall wiring
- External lighting and garden lamps
- Soft touch switch
- Air conditioners in bedrooms
- Universal electrical sockets
- Main power will be supplied by the Central Electricity Board (CEB)
- Standby generator for essential services in case of power cut
- Ceiling lights provided

Plumbing Services

- Main water supplied by Central Water Authority (CWA)
- Plumbing system PEX or equivalent
- Hot water and cold water service
- Water storage in underground water tank
- Septic tank and absorption pit
- Pressure pump

Common Areas

- The common areas have a floor tiled finish
- Glass balustrade where specified
- Common refuse waste collection area
- Use of timber, stone and coral stones where specified
- Boundary walls
- Paved parking area
- Low stone walls, planters and lush vegetation
- Common lighting disposal
- Swimming pool
- Beach access to all units
- CCTV camera
- Night Security guards

Living Luxury

Fonciera Group's Founders have diversified experiences in Real Estate Marketing, Engineering & Project Management and Property Investment Finance Advisory. The Founders have all profound knowledge in the property development market with long established partners and collaborators.

Promoting and developing exceptional high luxury end products is our passion and all our team, partner and collaborator members share this common passion.

Passion leads to Innovation

Fonciera Group exclusively develops all its projects using an innovative Insulated Reinforced Concrete Building System (IRCBS) Australian invented and patented technology. Reinforced concrete has been used for centuries mostly in the development of massive tower buildings.

Strength

Due to its engineered strength, Reinforced Concrete (RC) is re-known for its robust attributes to extreme climate and weather conditions. Our system is ideal for high seismic regions, unstable lands and cyclonic prone regions.

Thermal Insulation

IRCBS technology provides with an ingenious thermally insulated constructions through an in situ foam work within the reinforced concrete panels.

More Durable

All listed attributes combined, provide with an upscale and much more durable than traditional building method. Our reinforced buildings are primitively built to last longer than conventional buildings.

Solid Investment

More durability means added investment value and capital appreciation. Compared to conventional buildings where averagely 50% of costs goes into material costs, our constructions focuses more on the building materials with 70%+ of costs into the high end quality of our raw materials and finishing.

Higher Luxury Finish

Our construction panels are fabricated in a high end technology facility which guarantees our superior and unrivaled quality finish for all our constructions.

Environmental Friendly

Thermal insulation also means controlled room temperature and therefore a more efficient energy consumption leading to an eco friendly building technique.

Moisture Resistant

Our insulated reinforced concrete panels are as well moisture resistant due to our built in foam work in all our reinforced concrete panels.

Crack Resistant

Our construction techniques originally involves fiber glass meshing which is reputed to provide unrivaled high quality finishes and more importantly crack resistant attributes to all our projects.

Worldwide Reputation

Our Australian patented IRC group has a track record of more than 45 years in the construction industry in more than 60 countries worldwide.

Quality with no compromise

Our building system packed with all its cutting-edge benefits basically costs more than traditional construction techniques. Upscale quality has a price and as we strive our very best to match market rates, we engage ourselves to deliver the best transcendent luxury project developments in Mauritius without any compromise.

Yield more ROI in Less Time

Our developments are guaranteed and proven to be up to twice more time efficient than classic constructions. More time efficient developments means yielding faster return on investment (ROI) on your real estate investments.
